

CARB (California Air Resources Board) implemented limitations for formaldehyde emissions on all products manufactured from particleboard and MDF (medium density fiberboard). All Millennium doors: Infinity, Encore, Ovation and Bravo are in compliance.

While these requirements affect all doors sold or used in California, all Millennium doors shipped from both the Sacramento and Atlanta plants to any location or job site, will carry CARB labels/stamps. This label/stamp will include: ABS/Doormerica/Millennium Manufacturing, the production date of the door and the certification standard of the product, i.e., product meets CARB Phase II ATCM 93120.3 for formaldehyde emissions.
